PROFESSIONAL SUMMARY

Senior Full Stack Engineer and Associate Tech Lead with 9+ years of experience delivering enterprise-grade applications across Government, Telecom, and international sectors. Specialises in Angular, Java Spring Boot, Laravel, and REST APIs. Proven track record in large-scale digital transformation programmes including MOSIP identity platforms, CRVS systems, e-BMD portals, and IoT-enabled smart electricity solutions for LECO and CEB. Strong capabilities in technical leadership, solution architecture, and cross-functional team delivery.

TECHNICAL SKILLS

Frontend	Angular • React • TypeScript / JavaScript • HTML5 • CSS3 / SCSS • Bootstrap • Tailwind CSS
Backend	Java Spring Boot • PHP / Laravel • Node.js • CodeIgniter • REST APIs
Databases	MySQL • PostgreSQL • Database Design & Optimisation
DevOps & CI/CD	Jenkins • Docker • Rancher • SonarQube • Maven
Middleware	Apache Kafka • RabbitMQ • Keycloak
Architecture	Microservices • MVC • SPA • Component-Based • Layered • Responsive Web
Tools	Git / GitHub / GitLab • Jira • ClickUp • Postman • Swagger • Maven

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer / Associate Tech Lead

2024 – Present

Inova IT System with Bevolv

Tonga CRVS & ID Hub

2024 – Present

National digital transformation for the Kingdom of Tonga in collaboration with the Ministry of Justice and the World Bank. Modernised the Civil Registration and Vital Statistics (CRVS) ecosystem with a MOSIP-based Identity Hub.

- Implemented UIN generation, identity management workflows, and secure government interoperability
- Automated vital event registrations: Birth, Marriage, and Death
- Enhanced full-stack architecture for high availability, security, and cross-platform government integration

Tech: MOSIP, CRVS, Java, Angular, React, PostgreSQL, JavaFX

e-BMD Portal — Sri Lanka Registrar General's Department

2024 – Present

Developed the e-BMD system enabling overseas Sri Lankan citizens to obtain Birth, Marriage, and Death certificates through diplomatic missions. Phase one delivered an interim solution; phase two delivers a secure standalone portal with expanded features.

Tech: Java, Angular, MySQL

Land Registration System — Sri Lanka RGD

2024 – Present

Built a secure, scalable platform to digitise Sri Lanka's land registration process, replacing manual workflows and improving data accuracy.

Tech: Java, Spring Boot, Angular, MySQL

Trade Hippo — International Trading Platform

2024 – Present

Designed, developed, and deployed an all-in-one international brokerage platform integrating contract management, financial oversight, and smart analytics to support seamless global trading operations.

Tech: CodeIgniter, MySQL

Senior Software Engineer

2022 – 2024

Axiata Digital Labs (ADL)

DTE — Digital Telco Enabler

2022 – 2024

Contributed to a two front-end / 20+ microservice platform empowering ADL customers to create and customise diverse telecom services.

Tech: Angular, Java Spring Boot, Microservices

ADL Marketplace

2022 – 2024

Led development of two front-end applications and six-plus back-end microservices facilitating dynamic product and service creation for the marketplace.

Tech: Angular, Java, Microservices

M-Agri — Smart Agriculture City

2022

Delivered comprehensive services for factory and farm management as part of ADL's Smart Agriculture City initiative.

Software Engineer

2017 – 2022

Dialog Axiata PLC

Dialog Sooms — Meeting Room Reservation System

2021

Designed a reservation system enabling users to book meeting rooms with personalised features for data observation and analysis.

HR Marketplace Interview Platform

2021

Developed an interview management and monitoring solution tailored for HR departments.

LECO Smart Metering & Management System

2020 – 2021

Developed an electricity management and monitoring solution for the Lanka Electricity Company (LECO). Implemented monitoring dashboard, utility dashboard, and systems for Meter and NMD (network monitoring device) devices, along with a history data management system.

CEB Smart Metering & Management System

2019 – 2020

Delivered smart metering and management solution for the Ceylon Electricity Board (CEB).

Dynamic Dashboard for IoT Platform

2019 – 2020

Developed a dynamic web-based dashboard allowing users to create widgets for IoT device management and monitoring.

Smart Electricity System R&D — LECO Public & Utility Dashboard

2017 – 2019

Created a public dashboard displaying electricity network zones on a map, providing customers access to account information and data analytics. Developed a plug-in for the Electricity Network Monitoring Device (NMD) with APIs for real-time readings and a utility dashboard for monitoring the LECO network.

MIFE Repository Dashboard

2017 – 2018

Built a dashboard for API management within the MIFE platform.

ADS MIFE Project

2017 – 2018

Developed a system for API and Axiata Services management.

M2M — SIM Management & Monitoring Solution

2017 – 2018

Built a SIM management and monitoring solution for Dialog Axiata.

Associate Software Engineer

2016 – 2017

Ceylon Linux (Pvt) Ltd

Watawala Sales Management System

2016 – 2017

Developed a comprehensive sales management system for Watawala Tea Ceylon Ltd., featuring web and mobile applications. Encompassed store management, sales management, employee management, and routing management functionalities.

Siddha Lepa Sales Management System

2016 – 2017

Developed a management system for Hettigoda Industries (Pvt) Ltd., covering store management, sales management, employee management, and routing management.

EDUCATION

Bachelor of Computer Science (General Degree)

2016

University of Ruhuna

G.C.E. Advanced Level

2012

District Rank: 15 | Island Rank: 334 | Chemistry (A) • Physics (B) • Combined Mathematics (C)

G.C.E. Ordinary Level

2007

3 A's, 4 B's, 1 C, 1 S
